DETAILED ACTION

1. This communication is in response to the amendment filed 8/20/2007. After a search and thorough examination of the present application and in light of the prior art made of record, claims 4-7,14,15,18,19(renumbered as 1-8) are allowed.

Reason for allowance

2. The prior art made of record does not teach or fairly suggest A method of searching a document having nested-structure document-specific markup, the method comprising: receiving a query that designates at least (A) a phrase to be matched in a phrase matching process, and (B) a selective designation of at least a tag or annotation that is to be ignored during the phrase matching process; deriving query-specific indices based on query-independent indices that were created specific to each document, wherein the step of deriving the query- specific indices includes forming at least one of a group including: an index of each word in the phrase to be matched by the phrase matching process; an index of context tags that may be found in the document; and an index of at least a tag or annotation to be ignored during the phrase matching process, wherein the query-independent indices were created by a method including: a) labeling elements in the document with intervals, wherein: a1) for markup tags. the intervals are defined in terms of a starting index number associated with an opening markup tag and an ending index number associated with a closing markup tag that corresponds to the opening markup tag, and a2) for single words, the intervals are defined in terms of a single index number associated with the word and b) forming the query-independent indices so that they are configured to be used in
